

**THE PERFECT FLOOR FOR
YOUR ELECTRIC CARGO VAN:**

THE E-FLOOR

EASY. EFFICIENT. EV READY.

THE PERFECT FIT FOR YOUR ELECTRIC VEHICLE

Ranger Design's unique E-Floor is designed to offer the best fit for both your electric or gas powered vehicles.

EV FRIENDLY

Ranger Design's floor is a new concept that installs directly into the D-rings of the van. This prevents accidentally drilling into any wiring just below the surface of your vehicle's OEM floor, making it the perfect solution for EV's!

EASY INSTALL

The install of the E-Floor is quick (half the time of any other floor) and simple. This option also ensures a great resale value for your vehicle in the future, as the install leaves no permanent damage.
